The right to reject any or all bids is reserved.
All goods to be delivered before January 1st, 1889. Payment to be made by warrant on state treasury.
GEO. W. MCBRIDE,
Secretary of State.

Real Estate Bargains.

\$1,600—160 acres, 6 miles from O & C depot. Good house, barn and 1/2 in cultivation.
\$2,000—80 acres, 4 miles from Salem. Good road to town. Improved orchard. Fine fruit land.
\$5,400—80 acres 2 1/2 miles from Salem. No buildings. Splendid land, all fenced. Make a desirable home.
\$2,500—60 acres 4 miles from Salem. Improvements good. Fine young orchard, and garden land.
\$4,180—107 acres, 7 miles from Salem. Hill land, finely watered. Sell in lots of 40-acre tracts at \$25 per acre.
\$10,800—675 acres, 8 miles from Salem. Excellent grass and fruit land, adjoining Willamette river. Will sell in tracts.
\$1,375—51 acres, 4 miles from Salem. House, barn and orchard. Large spring at the door. Good soil, and plenty of timber.
\$2,400—120 acres, 5 miles from Salem; good road, well improved; stream running through the place.
\$60,000—400 acres (4 miles west side O & C R R.) good house, barn and orchard, 130 in cultivation, balance oak grub pasture land.
\$800—10 acres, 1 mile from Salem, adjoining fair ground. Good land, no improvements.
\$1,200—40 acres, 5 miles from Salem; all in cultivation; no buildings; near school house. Excellent fruit land.
\$4,000—570 acres, 8 miles from O & C R R.; all fenced; well watered. House, barn, and small orchard; 150 acres in cultivation.
\$2,750—3 lots, with good house and barn, East Salem. Desirable location.
We have besides this a large list of city and farm property. Buyers would do well to call and examine our holdings before making their purchases.
WILLIS & CHAMBERLIN,
Opera House, Court St.,
Salem, Or.

LOG CABIN LOGIC.

Brawn and Brain!
The powerful engine, with its wonderful propelling power, coupled to the long train full freighted with the richest fabrics of the intellectual looms of the centuries—what obstacles can stay the progress of this mighty force, when once under full steam along life's highway?
The American with brawn and brain does not see the necessity for the fabrics of nobility, does not care for elevation by descent, he can reach out and pluck the stars.
But with brawn or brain impaired, a man is badly handicapped in the mad race for success which is the marked characteristic of the present age.
The physical system is a most intricate piece of machinery. It ought to be kept well regulated, so that it will work harmoniously in all its parts, then it is capable of an immense amount of work.
It is said that a watch, if expected to keep perfect time, must be wound daily. It will not keep good time unless it "runs regular." More men break down because they don't "run regular" than from any other reason.
It is claimed by physicians that few men are killed by hard work. It is to the irregularities of modern social life that the high death rate is due. Men burn their candle at both ends, then wonder why it burns out so quickly.
The main thing in keeping the human machine in good working order is to keep the regulator all right. "The blood is the life," and sound health is assured so long as the blood flows through the veins a limpid stream of purity.
Regulate the regulator with Warner's Log Cabin sarsaparilla, the old-fashioned blood purifier, prepared after the best formula in use by our ancestors in good old Log Cabin days, and with the vigor of brawn and brain which must ensue, in your life's lexicon you will find no such word as fail.

"The Madonna at the Tub."

Of whom Miss Phelps writes, was a genuine specimen of health and strength. She doubtless heeded the warnings of her predecessors, and understood and appreciated the matchless qualities of Dr. Pierce's Favorite Prescription, which relieves and cures so many ailments peculiar to the sex. As a powerful, invigorating tonic, it imparts strength to the whole system, and to the womb and its appendages, in particular. For over-worked, "worn-out," "run down," debilitated teachers, milliners, dressmakers, seamstresses, "shop girls," housekeepers, nursing mothers, and feeble women generally, "Favorite Prescription" is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

For constipation, sick, or bilious headache, use Dr. Pierce's Pellets, orantibilious granules: purely vegetable. One a dose.
Personal.
N. H. Frohlichstein, of Mobile, Ala., writes: I take great pleasure in recommending Dr. King's new discovery for consumption, having used it for a severe attack of bronchitis and catarrh. It gave me instant relief and entirely cured me and I have not been afflicted since. I also beg to state that I had tried other remedies with no good result. Have also used Electric Bitters and Dr. King's New Life Pills, both of which I can recommend. Dr. King's New Discovery for consumption, coughs and colds, is sold on a positive guarantee. Trial bottles free at H. W. Cox's drug store.

Proposals for Wood.

THE BOARD OF TRUSTEES OF THE Oregon State Insane Asylum hereby invite sealed proposals for wood as follows:
Four hundred (400) cords dry pole oak.
Two hundred (200) cords dry body oak.
Fourteen hundred (1400) cords dry body fir out of large trees.
The pole oak must not be less than three inches in diameter. Three hundred to five hundred cords of fir, and two hundred to three hundred cords of oak are to be delivered by June 1, 1889, and the remainder by October 1, 1889.
Bids will be received in amounts from fifty cords up. The wood must be four feet in length and of the best quality, subject to the approval of the medical superintendent of the asylum, and to be delivered at any point on the asylum grounds designated by him.
The right to reject any and all bids is reserved.
Bids will be opened at 2 o'clock Tuesday, Nov. 6, 1888.
WILLIAM PENNOYER
GEO. W. MCBRIDE,
O. W. WEBB,
Board of Trustees.
WM. A. MUNSLY, Clerk of Board.

THE BUYERS' GUIDE is issued March and Sept. each year. It is an encyclopedia of useful information for all who purchase the luxuries or the necessities of life. We can clothe you and furnish you with all the necessary and unnecessary appliances to ride, walk, dance, sleep, eat, fish, hunt, work, go to church, or stay at home, and in various styles and quantities. Just figure out what is required to do all these things comfortably, and you can make a fair estimate of the value of the BUYERS' GUIDE, which will be sent upon receipt of 10 cents or pay postage, MONTGOMERY WARD & CO., 111-114 Michigan Avenue, Chicago, Ill.

"IS MEDICINE IN A FOG?"

EDITOR JOURNAL.—In an article in your paper of the 24th inst., entitled "Is Medicine in a Fog?" the writer arrives at an affirmative conclusion, because doctors frequently differ and patients sometimes die, and as a summary of his research in this particular field, he tells us that "uncertainty and disagreement are generally based on ignorance."
Let us see if these statements are any more true of medicine than any other science. Lawyers differ, and the principal business of their lives is to argue over their different versions of the law. One court overrules the decision of another, and finally the whole law of the case may be repealed, and another enacted in its stead, hence law is in the fog, and the science of government a failure. Theologians constantly differ, consequently the plan of salvation is in the fog, and Christianity a myth.

Even newspaper editors have been known to differ most radically—if possible worse than doctors—therefore, all the great minds engaged in this field of literature are in a fog, and in pursuit of a phantom.

Is it not a fact, however, that difference of opinion and argument are suggestive of thought, research and progressiveness, while besotted ignorance, knowing nothing of progressive science, is harmonious and content?

Just so long as any of the laws instituted by the Creator for the control of the mechanisms of the world remain unsolved, just so long will intelligent minds continue to disagree and discuss their differences. But why should the medical profession be expected to be so far in advance of every other department of science?

Is a profound knowledge of human anatomy, (the physical machine) of physiology, (or the machine in motion) or pathology, which is perverted physiology or disease, and then a microscopic study of the ultimate cell, which is an empire of itself, performing its functions on its own account, and at the same time in harmony and union with its million of fellows, which make up the mass of the body, and all of which must functionate normally for the maintenance of health and a perversion of which constitutes disease, and often results in death, the very contemplation of which carries the conscientious student to the very confines of the infinite—are these mighty problems and their solution to be compared to "mending a leaky roof"? Such comparisons certainly show a very indifferent understanding or appreciation of what progress in medical science means. It would make this article too long to more than refer to our Jenners and Pasteurs in the field of prevention—or the Emmetts, Sims, Billroths and Lister, whose minds have shown surgery of its terrors, and reduced fatality attending certain surgical operations to almost nothing.

In conclusion, Mr. Editor, is it not a fact, that both the secular and religious press have been most persistently in the service of the most ardent types of quacks and pretenders? Men who are competent to mould public opinion, and educate the public, ought to be able to recognize a traveling charlatan—and if they then sell him their columns that he may carry out his designs, they ought at least to be the last to criticize the honest profession.

INDEX.

National Surgical Institute.

Two or more surgeons representing this Institute will be at the Chemeketa hotel, Salem, November 10th, 1888.
They come fully prepared with all the apparatus necessary for the successful treatment of their specialties, curvature of the spine, diseases of the hip and knee joint, crooked limbs, club feet and all bodily deformities. Their success in treating these troubles as well as all chronic and sexual diseases has made for the Institute a national reputation.
Upon application, references will be furnished from patients in all parts of the United States.
All persons who are suffering from any of these complaints, should not fail to take advantage of this opportunity for relief.

Sanburn, tan, roughness of the skin and pimples are promptly relieved and cured by applying Dufard's Specific. It is a never failing remedy for salt rheum, tetter and all skin diseases.
Sold by D. W. Matthews & Co.

TELEGRAPHIC TIDINGS.

Important Events of the Whole World for Twenty-four Hours.

Territorial Resources—Yellow Jack—
Schooner Wrecked—General Dispatches.

More Yellow Fever.

WASHINGTON, Oct. 29.—Surgeon Hutton, at Compperry, Florida, and Surgeon Wriggorth, at Live Oaks, Fla., have telegraphed to the surgeon-general that they have evidence of the existence of yellow fever at Baldwin, Fla.

A Woman For Governor.

BOSTON, Oct. 29.—Seventy-one women in convention yesterday nominated Miss Alice C. Stockton, of Wheelock, as candidate of the equal rights party for governor of Massachusetts. The candidate is twenty-six years of age.

Sad Fate of Stanley.

LILLE, France, Oct. 29.—The Echo du Nord states that the president of the Geographical Society of Lille has received news from Africa that Henry M. Stanley has been massacred, with all his expedition except two men. The story is discredited in London.

In Favor of the Drummer.

WASHINGTON, Oct. 29.—In an opinion rendered by Justice Bradley in the supreme court of the United States to-day, he declares unconstitutional all state laws imposing license tax on commercial travelers not residents of the state so imposing.

A Detective's Investigation.

PITTSBURGH, Oct. 29.—The Chronicle telegraphs to-day to the Press a letter from a young American in London giving the theory, results of the investigations of a London detective in the Whitechapel murders, who declares that the crimes were committed by women or men dressed in women's clothes.

Earthquakes in Massachusetts.

NEW BEDFORD, Oct. 29.—This city was visited by two well defined earthquake shocks last night. The shocks were felt at 11:25 o'clock and were preceded by a rumbling sound and three distinct oscillations. They were followed by a tremulous movement preceded by two reports like those of heavy guns or thunder.

Cannibals in Africa.

LONDON, Oct. 29.—Advices from Bonny River, Africa, give a revolting story of savage atrocities and cannibalism. The Okrikan tribe, in revenge for some injury, invited a party of Ogonis to a friendly palaver, and then entrapped and massacred them. A cannibal festival of the most horrible and indescribable character followed. Then an attack was made upon the undefended villages, and the most barbarous outrages were committed. Over 150 persons, including women and children, were killed and eaten.

Water for the Arid Plains.

SAN FRANCISCO, Oct. 29.—A letter received from Maj. Mills, now at Washington, says in an interview with Maj. Powell, chief of the geological survey, upon the subject of the building of reservoirs in the arid regions of the West, Maj. Powell speaks favorably of the recently conceived plan of erecting an immense dam in the Rio Grande river near the city. He thinks such a reservoir would control the annual floods below it, and that a portion of the \$100,000 appropriated by congress for experimental investigation in the matter will be expended at El Paso.

Montana's Annual Report.

WASHINGTON, Oct. 29.—Preston H. Leslie, governor of Montana, in his annual report to the secretary of the interior, estimates the population of the territory at 140,000, an increase of 10,000 over the estimate of last year. All the industries of the territory have been highly active and prosperous during the year. Agriculture made rapid strides forward, and it can be stated in truth that the average yield per acre of wheat, oats, potatoes and cultivated grass in Montana for 1887 was not equaled by that of any other territory or state. The commercial

operations of the territory during the year aggregate \$49,000,000. The assessed value of taxable property of the territory is \$69,000,000.

Points From Portland.

PORTLAND, Oct. 30.—Yesterday morning Myra Brown was attacked by a large dog. The savage animal fastened its fangs in the lady's dress and tore out over a yard of it. A number of gentlemen hurried to the lady's assistance and scared off the savage animal. The lady, though not hurt, was almost scared to death. A coupe was summoned and Miss Brown conveyed to her home.

The American bark Coloma sailed this morning for Hong Kong via Australia with about 200 Chinese steerage passengers, ten cabin, and a cargo comprising 200,000 feet of lumber, 140 spars and about fifteen tons of old glass. The old glass belongs to the Chinese passengers.

Preston C. Smith, President of the Portland Cable Railway says that work will begin just as soon as the Presidential election is over. Mr. Geo. W. Lynch will come from San Francisco and begin work which is to be completed in eighteen months.

The Governor's Annual Report.

WASHINGTON, Oct. 29.—The annual report of Governor Semple, of Washington Territory, is very large and comprehensive, but he says he has no expense account. He has had to rely on the public-spirited citizens. The population is 167,982, an increase of about 42,000 in the past year.

The taxable property is valued at \$84,621,182, being an increase of \$65,000,000 in ten years.

The financial condition of the Territory is most prosperous, and although a penitentiary and other buildings have been erected in the past year, the treasury is but little behind.

Nearly 600,000 acres of land have been entered by settlers during the past year. During the year individual owners and railroads have sold over 1,000,000 acres, and much more would have been settled on had it been surveyed.

There are 1197 miles of road and more in the course of construction.

All the industries from cattle raising to mining are in a most prosperous condition and employees get good wages.

The condition of the various Indian tribes is reported good, and the majority fast becoming civilized.

A Sensation in Politics.

NEW YORK, Oct. 29.—By a state law all public offices are ordered closed after 12 o'clock noon on Saturday. Notwithstanding this law the registration offices were kept open last Saturday all day, and over 32,000 persons registered. As it is impossible to separate those who registered before noon from those who registered later, the Sun states that the entire list may have to be thrown out. The Sun interviewed fifty leading lawyers, and states that they all held that the registration offices are "public offices," and within the scope of the Saturday half-holiday law.

The statement is made that Mrs. John A. Logan, although absent in Europe for a year, is to be associated editorially with a new monthly, of which the first number will be issued in November. Her name will appear as the principal conductor.

At the hearing of the case of the contested will of Mrs. A. T. Stewart, it was developed that her annual expenses were \$100,000, and it cost \$800 to bury her husband.

A Return to Duty.

This is always desirable, and the speedier it takes place the better. Doubly welcome is it in the case of those unusually industrious little organs, the kidneys, which, when they go on a strike—so to speak—and drop work, seriously imperil health in more than one way. First and foremost, their inaction begets their disease, which is hydronephrosis, including such dangerous maladies as Bright's disease and diabetes. Next, when they are inactive they fail to assist in removing from the blood impurities that beget rheumatism, gout and dropsy. Third, their inaction weakens the bladder. All this is preventable and remediable by the pleasant promoter of organic action, Hostetter's Stomach Bitters, at once a tonic and regulator. This gently but effectively impels the kidneys to return to duty and strengthens them and the bladder. Upon the bowels, stomach and liver it likewise exerts a regulating and invigorating influence, and it strengthens the system, and averts and remedies malaria and rheumatism.
